

Post-Care Monitoring,

Perfected.

Transforming patient anxiety into actionable Real-World Evidence.

What Sanofi is Doing Now

- ✓ **World-Class Delivery:** Distributing billions of life-saving vaccines and specialty medicines globally.
- ✓ **Standard Patient Education:** Providing high-quality medical information primarily via physical pamphlets and static resources.
- ✓ **Clinical Partnerships:** Trusting healthcare partners and local clinics to manage all post-treatment patient monitoring.

The Emerging Challenges

- ⚠ **Patient Uncertainty:** Patients often feel anxious about normal side-effects once isolated at home.
- ⚠ **Clinical Overload:** Partner clinics are burdened with high volumes of routine calls for expected immune responses.
- ⚠ **Data Disconnect:** Real-World Evidence (RWE) is difficult to capture directly from the patient at scale post-administration.

 **The Opportunity:** Bridging the gap between world-class treatment and post-care reassurance to support both patients and partner clinics.

Empowering Patients. Unlocking Clinics.

Aily is a frictionless, zero-download intelligent triage layer that proactively secures the patient journey.

Instant Clinical Resolution

Transforms passive worry into actionable guidance (e.g., "Apply ice," "Call SAMU 15").
Total peace of mind.

The RWE Pipeline

Automates post-market surveillance. Every patient interaction structures vital, anonymized data straight back to Sanofi.

A Frictionless Web-App Experience

BUILT FOR ACCESSIBILITY

Tell us about your vaccine

This helps us prepare the right follow-up check-in.

Which vaccine did you receive?

Fluzone High-Dose

When did you receive it?

04/11/2026

1 Seamless Onboarding

Clean UI drops the barrier to entry. Arthur logs his Fluzone High-Dose securely in two clicks.

Post-Immunization Check-In

Hi Arthur! It has been 24 hours since your Fluzone High-Dose vaccine. Please select any symptoms you are experiencing today:

Sore Arm / Redness

Muscle Aches

Fatigue / Tiredness

Swollen Lips / Face
Emergency symptom

No Symptoms Today

[Submit Report](#)

2 Zero-Type Triage

Large, accessible toggle buttons capture symptoms instantly. Escalations turn red immediately.

24-HOUR FOLLOW-UP

These symptoms can happen after vaccination.

REASSURING GUIDANCE
Your recovery is on the right track. These mild reactions are common signs that your body is building protection.

General Suggestions

- Keep the arm moving gently to reduce stiffness.
- Apply a cool, damp cloth to your arm.
- Drink water throughout the day to stay hydrated.

Would you like food ideas?
Gentle meals can help if you're tired.

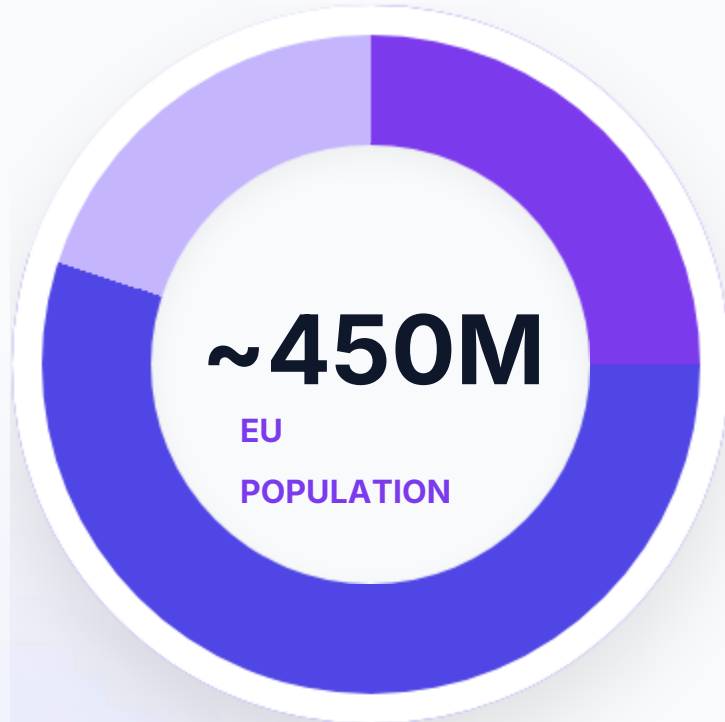

[Yes](#)

3 Guided Empathy

Automated standard care guidelines reassure patients and even suggest wellness support (food ideas).

The App Market Opportunity

EUROPEAN POPULATION

- Sanofi Clients (~25%)
- Non-Sanofi Clients (~55%)
- Limited / No Access (~20%)

Dual Revenue Engine

Phase 1: Sanofi Beachhead

Launching free to Sanofi's massive existing patient base. Secures our footprint, slashes clinic overhead, and generates proprietary Real-World Evidence (RWE) data streams.

Phase 2: Enterprise SaaS

A highly scalable subscription model licensed to independent hospital networks. Captures the remaining 55% of the market to manage their broader outpatient populations.

Go-To-Market Execution

ROADMAP TO SCALE

MAY - JUN 2026

Validate & Refine

Finalize clinical triage logic. Conduct extensive accessibility testing with elderly cohorts (70+ demographic).

Q4 2026+

Expand & Scale

EU-wide rollout. Unlock the "Medication" vertical with OCR prescription integration for chronic disease management.

JUL - AUG 2026

Land & Prove (Pilot)

Launch targeted beta in France, specifically monitoring the Fluzone High-Dose rollout in partner clinics to prove ROI.

De-Risking the Model: Medical Liability

Aily strictly provides "Standard Care Guidelines" via conservative AI pathways. We never diagnose. Anomalies trigger instant human escalation.
